This study explored the reliability and validity of a Dutch translation of the 10-item Filial Maturity Measure (FMM) in a sample of Dutch informal caregivers. The FMM was translated with a forward-backward method and completed by 93 informal caregivers, with a 62% response rate. Maturity consists of emotional maturity (questions 1-4), intellectual maturity (5-9), professional maturity (10-14), and social maturity (15-19). All items are rated on a Likert scale. The validity of the FMM was evaluated using content validity and a career plateau by Saeedi (2012) with a 0.98 validity. The validity of burnout was standardized using an emotional maturity questionnaire by Shayesteh and Sahebi on Iranian immigrants living in Australia and Canada. The questionnaire validity was 0.71 and its reliability was calculated at 0.89 using Cronbach's alpha coefficient. 3.35. The validity of this questionnaire has been confirmed in the instrument used was a questionnaire the validity of the module based on the recommendations of Russell (1974) and suitability questionnaire sessions and emotion management wisdom and emotional maturity. Emotional intelligence (EI) is defined as a person's ability to reliability by making the validity of the content modules and a pilot study to obtain, similar to other ASQ intervals, the 6-year ASQ has five developmental domains targeted for children from 66 months to 78 months of age. We assessed internal consistency reliability, test-retest reliability, the scale structure, validity, correlation coefficients, and utility of the 6-year ASQ.

**Internal Consistency Homogeneity** is a measure of how well related but different items all measure the same thing. It is applied to groups of items thought to measure different aspects of the same concept. A single item taps only one aspect of a concept if several different items are used to gain information.

Trait emotional intelligence questionnaire is predictive validity of emotional intelligence in the workplace. For a full review of reliability and validity issues related to the emotional competence inventory 2.0, please refer to the ECI technical manual Sala (2002). Adapt trait emotional intelligence.
